

Tema 9

(13)

a) $(2, 3, 7, 20, 35, 69), V = 45.$

$$\begin{array}{l} 2 < 3 \quad 2+3+7 < 20 \quad 32 \neq 35 < 69 \quad \Rightarrow \text{nu e} \\ 2+3 < 7 \quad 12+20 < 35 \end{array} \quad \begin{array}{l} \text{gih} \\ \text{super} \\ \text{cresc.} \end{array}$$

$$\boxed{45 = 35 + 7 + 3} \Rightarrow (0, 1, 1, 0, 1, 0)$$

b) $(1, 2, 5, 9, 20, 49), V = 73.$

$$1 < 2; 3 < 5; 8 < 9; 17 < 20; 37 < 49 \Rightarrow \text{nu e} \\ \text{super} \\ \text{cresc.}$$

$$\boxed{73 = 1 + 2 + 9 + 20 + 49}$$

$73 = 49 + 20 + 4$ - nu se poate compune elem. din gih.

c) $(1, 3, 7, 12, 22, 45), V = 67.$

$$1 < 3; 4 < 7; 11 < 12; 23 > 22 \Rightarrow \text{nu e super} \\ \text{cresc.}$$

$$\cancel{V = 73 =}$$

$$\boxed{V = 67 = 45 + 22 = 45 + 12 + 7 + 3}$$

d) $(2, 3, 6, 11, 21, 30)$

$2 + 3 + 6 = 11 \Rightarrow$ nu e supercresc.

$V = 39 = 21 + 11 + 6 + \dots$ - nu poate fi scris ca suma.

e) $(4, 5, 10, 30, 50, 101)$

$4 < 5; 4 < 10; 19 < 30; 49 < 50; 99 < 101 \Rightarrow$

\Rightarrow nu e supercresc \Rightarrow

$101 + 99 = 200 = 186 + 10 + 4 \Rightarrow 186 + 10 + 4$

$\Rightarrow \cancel{V = 4 + 10 + 30}$

$\Rightarrow V = 5 + 30 + 50 + 101; \quad \cancel{K(0, 1, 0, 1, 1, 1.)}$

f) $(3, 5, 8, 15, 28, 30)$

$3 + 5 + 8 + 15 > 28 \Rightarrow$ nu e super cresc.

$V = 43 = 15 + 28 = 30 + 8 + 5$
